DEPARTMENT OF TRANSPORTATION FEDERAL AVIATION ADMINISTRATION

TYPE CERTIFICATE DATA SHEET NO. A8SO

This data sheet, which is part of Type Certificate No. A8SO prescribes conditions and limitations under which the product for which the type certificate was issued meets the airworthiness requirements of the Federal Aviation Regulations.

Type Certificate Holder: Sky International Inc. (See Note 6)

672 South Washington Street Afton, Wyoming 83110

Model S-1S, 1POLB (Acrobatic Category), Approved 13 February 1973.

Engine Lycoming IO-360-B4A with Bendix Injector No. RSA-5AD1

Fuel 100/130 minimum grade aviation gasoline

Engine Limits 180 HP @ 2700 RPM for all operations

Propeller and Senser Propeller Limits

Sensenich, fixed-pitch, 76EM8-0, diameter 76 in., no cutoff permitted.

Prop. Pitch vs. Allowable Static RPM

Prop Pitch *	Minimum	Maximum		
56"	2350	2450		
57"	2325	2425		
58"	2300	2400		
59"	2275	2375		
60"	2250	2350		
61"	2225	2325		

^{*} at 28.5 inch blade station.

S.L. Static RPM limits at full throttle. No additional tolerance permitted.

Avoid continuous operation between 2150 and 2350 RPM

Airspeed Limits (CAS) V_{NE} (never exceed) 203 MPH (176 kts)

V_A(maneuvering) 154 MPH (134 kts)

V_{NO} (maximum structural cruising) 154 MPH (134 kts)

(For acrobatic maneuver entry speeds see Airplane Flight Manual)

Serial Nos. 10

Aerotek, Inc., Afton, Wyoming

2001 and up

Model S-2A, 2POLB (Normal and Acrobatic Category), Approved 11 Jun 1971.

The Model S-2A (S/N 1001, 2001 thru 2205) is identical to the Model S-2 except for (1) 200 HP engine, (2) constant speed propeller and associated control, and (3) normal category weight and C.G. range. S/N 2206 and up are further modified by (1) Lycoming AEIO-360-A1E engine (2) 3" longer landing gear, and (3) 2" wider fuselage in forward cockpit area. S/N 2219, 2231 and up are further modified by incorporation of symmetric ailerons and aerodynamic counter balances.

Engine Lycoming IO-360-A1A with Bendix Fuel Injector No. RSA-5AD1 and as

modified by STC SE469SO (Serial Numbers 1001, 2001 through 2085).

Lycoming AEIO-360-A1A with Bendix Fuel Injector No. RSA-5AD1 (Serial

Numbers 1001, 2001 and up).

Lycoming AEIO-360-A1E with Bendix Fuel Injector No. RSA-5AD1 (Serial

Numbers 2206 and up).

Fuel 100/130 minimum grade aviation gasoline

Engine Limits 200 HP @ 2700 RPM

Propeller and Hartzell HC-C2YK-4AF/FC7666A-2 Constant Speed

Propeller Limits Pitch: High $24^{\circ} \pm 1/2^{\circ}$, low 13 1/2° at 30" station, 72" minimum diameter,

74" maximum diameter. Avoid continuous operation between 2000 and 2350 RPM. Avoid continuous operation (red arc) above 2600 RPM in aerobatic flight

and full throttle level flight.

Propeller governor Hartzell F6-3A (S/N 1001, 2001 through 2205)

Hartzell F6-58Z (S/N 2206 and up)

Airspeed Limits (CAS) V_{NE} (never exceed) 203 MPH (176 kt.)

V_A (maneuvering) 154 MPH (134 kt.)

V_{NO} (maximum structural cruising) 154 MPH (134 kt.)

(For acrobatic maneuver entry speeds see Airplane Flight Manual)

C.G. Range Normal Category:

(+94.50 to +96.13) at 1575 pounds (+92.35) at 1350 pounds or less (+97.50) at 1472 pounds or less

Acrobatic Category:

(+95.58 to +97.50) at 1500 pounds (+92.35) at 1350 pounds or less (+97.12) at 1400 pounds or less

Straight line variation between points given

Datum 97.81" forward of lower wing leading edge

Data pertinent to all models

Empty weight C.G. Range

None.

Equipment

The basic required equipment as prescribed in the applicable airworthiness regulations (see certification basis) must be installed in the aircraft for certification. In addition, the following is required.

S-1S

- a. FAA approved flight manual dated February 13, 1973, or later FAA approved revision.
- b. See approved equipment list Airplane Flight Manual, Weight and Balance Section.

S-1T

- a. FAA approved flight manual dated July 24, 1975, or later FAA approved revision.
- b. See approved equipment list Airplane Flight Manual, Weight and Balance section.

S-2

- a. FAA approved flight manual dated March 8, 1971 or later FAA approved revision.
- b. See approved equipment list Airplane Flight Manual, Weight and Balance Section.

<u>S-2A</u>

- a. FAA approved flight manual dated June 11, 1971 or later FAA approved revision.
- b. See approved equipment list Airplane Flight Manual, Weight and Balance Section.

S-2S

- a. FAA approved flight manual dated May 29, 1981 or later FAA approved revision.
- b. See approved equipment list Airplane Flight Manual, Weight and Balance Section.

S-2B

- a. FAA approved flight manual dated April 4, 1983 or later FAA approved revision.
- b. See Approved equipment list Airplane Flight Manual, Weight and Balance Section.

S-2C

- a. FAA approved flight manual dated June 4, 1998 or later FAA approved revision.
- b. See Approved equipment list Airplane Flight Manual, Weight and Balance Section.

Optional Equipment

Refer to Weight and Balance Section of the Airplane Flight Manual for Optional equipment.

Certification Basis

FAR 23, effective February 1, 1965, including amendments 1 through 6. Application for type certificate, August 16, 1968.

FAR 36, dated December 1, 1969, plus amendments 36-1 through 36-11.

Production Basis

Production Certificate No 419, except the Model S-2. Prior to original certification of each Model S-2 aircraft, an FAA representative must perform a detailed inspection for workmanship, materials and conformity with the approved technical data and a check of the flight characteristics.

Export Eligibility

Aircraft will be eligible for issuance of an export certificate of airworthiness subject to compliance with Federal Aviation Regulations Part 21, Subpart L, Section 21.321 through 21.339. Special requirements of specific foreign countries are contained in Advisory Circular 21.2.

NOTE 1.

Current weight and balance report including list of equipment included in certificated empty weight, and loading instructions must be provided for each aircraft at the time of original certification. The empty weight and the corresponding center of gravity location must include the following unusable fuel:

S-1S - 6 pounds (@ +59.63)

S2 and S-2A – 6 pounds ((a) + 80.81)

S-1T-6 pounds (@ +59.50)

S-2S – 6 pounds (@ +92.00) and 6 pounds (@ +107.20)

S-2B - 6 pounds (@ +81.32)

S-2C - 6 pounds (@ +81.32)

NOTE 2.

All placards required in the approved Airplane Flight Manual must be installed in the appropriate locations.

NOTE 3.

S-2B aircraft S/N 5000 and up are approved for installation of the MT Propeller when installed in accordance with serialized AVIAT Kit S-2B-Pitch limits and diameter for the MT Propeller are shown on page 9 of this Type Certificate Data Sheet. An FAA Approved Flight Manual revision for the MT Propeller, for the Pitts S-2B is required.

NOTE 4.

S-2B aircraft S/N 5000 and up are approved for installation of the 3 blade Hartzell Composite Propeller when installed in accordance with serialized AVIAT Kit S-2B-526. Pitch limits and diameters for the propeller are shown on page 9 of this Type Certificate Data Sheet. An FAA Approved Flight Manual revision for the 3 blade composite Propeller, for the Pitts S-2B is required.

NOTE 5.

The S-2C aircraft S/N 6001 and up are approved for installation of the Electronics International, Inc. FLC-1CAB electronic fuel quantity indicating system per the Type Design data for that model.

NOTE 6.

AVIAT AIRCRAFT INC: Box 1240, 672 South Washington Street, Afton, Wyoming is licensed by Sky International, Inc. to manufacture and obtain airworthiness certificates for the Model aircraft listed in this Type Certificate Data Sheet.
